**STATE OF NEW MEXICO  
EMERGENCY DETERMINATION FORM**

The emergency procurement method (NMSA 1978, Section 13-1-127) may only be used when there exists a threat to public health, welfare, safety or property requiring procurement under emergency conditions. The existence of the emergency condition creates an immediate and serious need for services, construction or items of tangible personal property that cannot be met through normal procurement methods and the lack of which would seriously threaten:

1. the functioning of government;
2. the preservation or protection of property; or
3. the health or safety of any person.

I. **Name of Agency:** City of Las Vegas

**Agency Chief Procurement Officer:** Helen Vigil

**Telephone Number:** 505-454-1401

II. **Name of Contractor:** Hays Plumbing & Heating

**Address of Contractor:**

600 Railroad  
Las Vegas, NM 87701

**Amount of prospective contract:** \$22,911.62

**Term of prospective contract:** Upon Completion

III. **Please thoroughly list the services (scope of work), construction or items of tangible personal property of the contract:**

Emergency installation of a 12" ductile iron drain line at the water treatment plant to prevent water from backing up into the clear wells.

- IV. Provide an explanation for the justification of the procurement including a description of the emergency condition(s) requiring use of emergency procurement and the practicable competition utilized in compliance with NMSA 1978, Section 13-1-127.

With the current 6" drain line and its configuration the water plant cannot provide sufficient demand of water to the city. This 12" drain line will ensure that water sent to the lagoons will not back up and disrupt the water treatment plant capabilities and operations. This work will allow the water plant to continue operations and provide the city with sufficient water that meets the required EPA standards.

- V. Please describe what measures are being taken to minimize the duration and effect of this particular emergency procurement (for example: is the emergency only in place until a competitive process can be completed, etc.).

This emergency repair will improve the operational <sup>requirements</sup> ~~requirements~~ of the plant and ensure that sufficient water can be treated to provide potable water to the City residents and meet EPA standards.

- VI. Describe what measures the Agency will take in the future to prevent/mitigate use of an emergency procurement under similar circumstances.

Preventive maintenance will be conducted and reported to prevent future problems with system. RFP for commercial critical plumbing services, for unplanned or unexpected issues.
